Do you have questions about Laryngoscope system cleaning and compliance?

It's likely your Hospital is experiencing concern and confusion over the Joint Commission standards for cleaning and disinfecting Laryngoscope Blades and Handles.

Whether this has you considering a whole new approach to your Laryngoscope system, or evaluating certain portions of it, we have a solution for you. HEINE has developed a Laryngoscope system that provides you with performance unmatched by any other laryngoscope and handle system on the market, but also meets the standards of the joint commission.

The foundation of the HEINE solution is the highest quality Laryngoscope blade in the market, the Classic+ Laryngoscope blade.

- Single piece design for easy cleaning and maintenance free operation.
- Lifetime guarantee on the finish of the blade.
- 5 year fiber optic bundle warranty.
- Numerous validated cleaning and disinfection methods make compliance and processing simple and efficient.

See the reverse for Handle System Options.
HEINE Laryngoscope Handle Systems

Compliance Doesn’t Have To Mean Compromise.

As important as the quality of the Laryngoscope blade is the performance of the illumination source that it is used with. We have a full range of solutions for Hospitals, ranging from reusable handles that can be fully sterilized to reusable / disposable Hybrid systems, all utilizing the same outstanding illumination modules.

HEINE Reusable Handle Systems

- Available in LED and Xenon illumination - unmatched performance and brightness.
- 2.5V alkaline or 3.5V rechargeable options.
- Handle outer sleeves are fully autoclaveable.
- Xenon models can be sterilized complete in STERRAD machines.
- Full range of sizes available.
- ISO green system compatible.
- Detailed IFUs for compliance with Joint Commission.

HEINE XP® Disposable Handle System

- Disposable handle outer shell for Joint Commission compliance.
- Uses the same illumination inserts as our Reusable Handles - the benefits of disposable without the compromise of poor light quality. Up to 4x brighter than disposable handles.
- Simple inventory management.
- Extremely cost effective.
- Recyclable design is more environmentally responsible than the fully disposable handles.
- Simple to operate.
- Pair with HEINE Classic+® blades for the best performing, cost effective, and compliant system on the market.
